SUBJECT INDEX

Acetic acids,
acidities of substituted acetic acids 141
Alkenyl-naphthalenes,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105
Alkyl-binaphthyls,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105
AM1,
reliability of AM1 in conformational analysis of unionized amino acids 227
AM1 calculation,
protonation and *cis–trans* isomerization energies of the retinal Schiff base bonded to formic acid: an MNDO/H and AM1 calculation 287
Amino acids,
reliability of AM1 in conformational analysis of unionized amino acids 227
γ-Aminobutyric acid,
ab initio studies of γ-aminobutyric acid (GABA), γ-aminobutyric acid imine (GABA imine) and γ-aminooxyacetic acid (AOAA) 323
γ-Aminobutyric acid imine,
ab initio studies of γ-aminobutyric acid (GABA), γ-aminobutyric acid imine (GABA imine) and γ-aminooxyacetic acid (AOAA) 323
γ-Aminooxyacetic,
ab initio studies of γ-aminobutyric acid (GABA), γ-aminobutyric acid imine (GABA imine) and γ-aminooxyacetic acid (AOAA) 323
Ammonia dimers,
ab initio molecular orbital calculations of the infrared spectra of hydrogen bonded complexes of water, ammonia and hydroxylamine Part 3. Some further properties of the ammonia dimers 247
Angle strain,
the Echinos model of cluster electronic structure: what is angle strain? 15

1,1′Biisoquinoline,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105
2,2′Biquinoline,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105
Bond lengths,
additional standard bond lengths for use in ab initio molecular orbital calculations of neutral species 119

$C_2B_3H_5$,
a preliminary ab initio study of rearrangements in $C_2B_3H_5$ 191
Carbon monoxide,
ab initio molecular orbital calculations on linkage isomers of magnesium difluoride–carbon monoxide adducts 317
Chloroformyl hypochlorite,
structures, relative stabilities and barriers to internal rotation of chloroformyl hypochlorite and thiohypochlorite 217
Conformational analysis,
conformational analysis of 5*Z*- and 5*E*-vitamin D_3 dihydroderivatives by molecular mechanics 125
Cyanines,
electronic transitions of long chain cyanines 205
Cyanines à longue chaîne,

transitions électroniques des cyanines à longue chaîne 205

α,ω-Dibromoalkanes,
a Monte Carlo study of the dipole moment of α,ω-dichloroalkanes and α,ω-dibromoalkanes 147

α,ω-Dichloroalkanes,
a Monte Carlo study of the dipole moment of α,ω-dichloroalkanes and α,ω-dibromoalkanes 147

1,2-Dimethoxybenzene,
an STO-3G molecular orbital investigation of the methyl internal rotation in 1,2-dimethoxybenzene 309
the internal rotation of the methoxyl groups in 1,2-dimethoxybenzene: an STO-3G molecular orbital investigation using fully and partially optimized molecular structures 293

Dipole moment,
a Monte Carlo study of the dipole moment of α,ω-dichloroalkanes and α,ω-dibromoalkanes 147

Echinos model,
the Echinos model of cluster electronic structure: what is angle strain? 15

Electronic transitions,
electronic transitions of long chain cyanines 205

Fibroin protein,
^{15}N and ^{13}C NMR chemical shift calculations for the sequence analysis of *Bombyx mori* silk fibroin protein with FPT INDO method 135

Formamidine,
ab initio SCF calculations of the barrier to internal rotation in formamidine and its derivatives 1

Formic acid,
protonation and *cis-trans* isomerization energies of the retinal Schiff base bonded to formic acid: an MNDO/H and AM1 calculation 287

FPT INDO method,
^{15}N and ^{13}NMR chemical shift calculations for the sequence analysis of *Bombyx mori* silk fibroin protein with FPT INDO method 135

$HC_3H\cdots HC_3H$,
ab initio studies of the linear complex $HC_3H\cdots HC_3N$ 169

Hydrogen bonded complexes,
ab initio molecular orbital calculations of the infrared spectra of hydrogen bonded complexes of water, ammonia and hydroxylamine Part 3. Some further properties of the ammonia dimers 247

Internal rotation,
ab initio SCF calculations of the barrier to internal rotation in formamidine and its derivatives 1
an MNDO-effective charge model study of the solvent effect: the internal rotation about partial double bonds and the nitrogen inversion in amine 265
an STO-3G molecular orbital investigation of the methyl internal rotation in 1,2-dimethoxybenzene 309
structures, relative stabilities and barriers to internal rotation of chloroformyl hypochlorite and thiohypochlorite 217
the internal rotation of the methoxyl groups in 1,2-dimethoxybenzene: an STO-3G molecular orbital investigation using fully and partially optimized molecular structures 293

Internal rotational potential,
ab initio MO calculations of the internal rotational potential in thiophenol 335

Inversion processes,
theoretical analysis of the rearrangement and inversion processes in oxiranyl radicals 93

Linkage isomers,
ab initio molecular orbital calculations on linkage isomers of magnesium difluoride–carbon monoxide adducts 317

Magnesium difluoride,
ab initio molecular orbital calculations on linkage isomers of magnesium difluoride–carbon monoxide adducts 317

Methoxyl groups,
the internal rotation of the methoxyl groups in 1,2-dimethoxybenzene: an STO-3G molecular orbital investigation using fully and partially optimized molecular structures 293

MNDO-effective charge model study,
an MNDO-effective charge model study of the solvent effect: the internal rotation about partial double bonds and the nitrogen inversion in amine 265
MNDO/H calculation,
protonation and *cis-trans* isomerization energies of the retinal Schiff base bonded to formic acid: an MNDO/H and AM1 calculation 287
Molecular mechanics,
conformational analysis of 5*Z*- and 5*E*-vitamin D_3 dihydroderivatives by molecular mechanics 125
Monte Carlo study,
a Monte Carlo study of the dipole moment of α,ω-dichloroalkanes and α,ω-dibromoalkanes 147

Nitrogen inversion,
an MNDO-effective charge model study of the solvent effect: the internal rotation about partial double bonds and the nitrogen inversion in amine 265

Oxiranyl radicals,
theoretical analysis of the rearrangement and inversion processes in oxiranyl radicals 93

Photoionization cross-sections,
photoionization cross-sections in ethylene: calculations by RPA and Stieltjes imaging procedures 161
Pralidoxime,
an ab initio study of the structure and bonding of pralidoxime and its conjugate base 235
Proton potential functions,
ab initio calculations of proton potential functions of some rhodopsin modelling systems 279

Retinal Schiff base,
protonation and *cis-trans* isomerization energies of the retinal Schiff base bonded to formic acid: an MNDO/H and AM1 calculation 287
Rhodopsin,
ab initio calculations of proton potential functions of some rhodopsin modelling systems 279
Rotational barriers,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105
RPA imaging procedure,
photoionization cross-sections in ethylene: calculations by RPA and Stieltjes imaging procedures 161

Sequence analysis,
^{15}N and ^{13}C NMR chemical shift calculations for the sequence analysis of *Bombyx mori* silk fibroin protein with FPT INDO method 135
Solvent effect
an MNDO-effective charge model study of the solvent effect: the internal rotation about partial double bonds and the nitrogen inversion in amine 265
Stability,
the stability concept revisited 77
Stieltjes imaging procedure,
photoionization cross-sections in ethylene: calculations by RPA and Stieltjes imaging procedures 161
Substituted styrenes,
theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls 105

Thioacetone,
ab initio structural and conformational studies of thioacetone and thiopropionaldehyde 179
Thiohypochlorite,
structures, relative stabilities and barriers to internal rotation of chloroformyl hypochlorite and thiohypochlorite 217
Thiophenol,
ab initio MO calculations of the internal rotational potential in thiophenol 335
Thiopropionaldehyde,
ab initio structural and conformational studies of thioacetone and thiopropionaldehyde 179
Transitions électroniques,
transitions électroniques des cyanines à longue chaîne 205

Vitamin D_3 dihydroderivatives,
conformational analysis of 5*Z*- and 5*E*-vitamin D_3 dihydroderivatives by molecular mechanics 125

CONTENTS

Ab initio SCF calculations of the barrier to internal rotation in formamidine and its derivatives
W. Kinasiewicz, A. Leś and I. Wawer (Warsaw, Poland) 1

The Echinos model of cluster electronic structure: what is angle strain?
N.D. Epiotis (Seattle, WA, U.S.A.) 15

The stability concept revisited
G. Leroy (Louvain-la-Neuve, Belgium) 77

Theoretical analysis of the rearrangement and inversion processes in oxiranyl radicals
R. Caballol (Tarragona, Spain) and E. Canadell (Orsay, France) 93

Theoretical studies of rotational barriers in 1,1′-biisoquinoline, 2,2′-biquinoline and substituted styrenes, alkenyl-naphthalenes, and alkyl-binaphthyls
D. Leister and J. Kao (Richmond, VA, U.S.A.) 105

Additional standard bond lengths for use in ab initio molecular orbital calculations of neutral species
M. Ramek (Graz, Austria) and D.R. Armstrong (Glasgow, Gt. Britain) 119

Conformational analysis of 5*Z*- and 5*E*- vitamin D_3 dihydroderivatives by molecular mechanics
R.A. Mosquera, M.A. Rios, C.A. Tovar (Galicia, Spain) 125

^{15}N and ^{13}C NMR chemical shift calculations for the sequence analysis of *Bombyx mori* silk fibroin protein with FPT INDO method
T. Asakura, H. Yoshimizu, S. Ando and I. Ando (Tokyo, Japan) 135

Acidities of substituted acetic acids
C. Jinfeng, R.D. Topsom (Bundoora, Australia), A.D. Headley, I. Koppel, M. Mishima, R.W. Taft and S. Veji (Irvine, CA, U.S.A) 141

A Monte Carlo study of the dipole moment of α,ω-dichloroalkanes and α,ω-dibromoalkanes
E. Vilaseca (Barcelona, Spain) 147

Protonization cross-sections in ethylene: calculations by RPA and Stieltjes imaging procedures
V. Galasson (Trieste, Italy) 161

Ab initio studies of the linear $HC_3H\cdots HC_3N$
C.A. Taft, J.C. Azevedo (Rio de Janeiro, Brasil), J.G.R. Tostes (Niterói, Brasil) and W.A. Lester, Jr. (Berkeley, CA, U.S.A.) 169

Ab initio structural and conformational studies of thioacetone and thiopropionaldehyde
R. Fausto, J.J.C. Texeira-Dias (Coimbra, Portugal) and P.R. Carey (Ottawa, Canada) 179

A preliminary ab initio study of rearrangements in $C_2B_3H_5$
M.L. McKee (Auburn, AL, U.S.A.) 191

Transitions électroniques des cyanines à longue chaîne
L. Grajcar (Orsay ,France) and J. Baudet (Paris, France) 205

Structures, relative stabilities and barriers to internal rotation of chloroformyl hypochlorite and thiohypochlorite
Suk Ping So (Shatin, Hong Kong) 217

Reliability of AM1 in conformational analysis of unionized amino acids
M. Masamura (Okayama, Japan) 227

An ab initio study of the structure and bonding of pralidoxime and its conjugate base
C.S. Ewig and J.R. van Wazer (Nashville, TN, U.S.A.) 235

Ab initio molecular orbital calculations of the infrared spectra of hydrogen bonded complexes of water, ammonia and hydroxylamine Part 3. Some further properties of the ammonia dimers
G.A. Yeo and T.A. Ford (Wits, South Africa) 247

An MNDO-effective charge model study of the solvent effect: the internal rotation about partial double bonds and the nitrogen inversion in amine
T. Kozaki, K. Morihashi and O. Kikuchi (Tsukuba, Japan) 265
Ab initio calculations of proton potential functions of some rhodopsin modelling systems
D. Hadži, J. Koller and M. Hodošček (Ljubljana, Yugoslavia) 279
Protonation and *cis–trans* isomerization energies of the retinal Schiff base bonded to formic acid: an MNDO/H and AM1 calculation
J. Koller, M. Hodošček and D. Hadži (Ljubljana, Yugoslavia) 287
The internal rotation of the methoxyl groups in 1,2-dimethoxybenzene: an STO-3G molecular orbital investigation using fully and partially optimized molecular structures
H. Konschin (Helsinki, Finland) 293
An STO-3G molecular orbital investigation of the methyl internal rotation in 1,2-dimethoxybenzene
H. Konschin and B. Malmelin (Helsinki, Finland) 309
Ab initio molecular orbital calculations on linkage isomers of magnesium difluoride–carbon monoxide adducts
A.H. Jubert, S.A. Maluendes, E.A. Castro (La Plata, Argentina) and K. Nakamoto (Milwaukee, WI, U.S.A.) 317
Ab initio studies of γ-aminobutyric acid (GABA), γ-aminobutyric acid imine (GABA imine) and γ-aminooxyacetic acid (AOAA)
L. Fugler-Domenico, C.S. Russell, A.M. Sapse and E.A. Debler (New York, NY, U.S.A.) 323

Short Communication
Ab initio MO calculations of the internal rotational potential in thiophenol
G.H. Penner (Winnipeg, Man., Canada) 335
